

Chromebook 1:1 Program

West Side Elementary Expectations

Educational Purpose

The purpose of the Chromebook 1:1 Program is to provide equipment and resources that meet the needs of today's students and help them to become future ready. Having a tool, such as a chromebook, can open up many exciting creative educational opportunities.

The chromebook program helps facilitate:

- Access to digital educational resources - including resources and ebooks paid for by our West Side library program (checkout our library resources webpage)
- Availability of resources beyond the school day and outside the school building
- Individualized learning
- Creativity and Innovation
- Critical thinking and problem solving
- Communication and collaboration
- Technology literacy skills - including Internet Safety and Security

Expectations

- It is the student's responsibility to charge their computers at home each night and bring their devices fully charged each morning. Students should consider the charging of their chromebook to be a nightly "homework" assignment. Teachers will be designing many of their lessons and classroom activities based on students having access to their chromebook. Chromebooks should be brought to school fully charged everyday!
- Chromebooks should be carried to and from school in the carrying case provided.
- The chromebook is school property and should be used and treated responsibly. Students are to only access content and websites as directed by their teachers.
- Chromebook use, in and out of school, will follow the Elkhorn Area School District's [Acceptable Technology Use Agreement](#)
- If the chromebook is in need of repair, please have your child turn it into the library. They will receive a Chromebook to use during the school day until their device can be fixed by the Technology Department Staff.
